

ISIA CERTIFIED TRACEABILITY

In March 2022, the International Serum Industry Association renewed Avantor Seradigm's traceability certification.

ISIA certification is awarded after successful completion of an independent audit to ensure adherence to the industry's strictest standards for traceability. Only those serum suppliers who have proven compliance via audit can use the ISIA Seal of Quality.

INTERNATIONAL SERUM INDUSTRY ASSOCIATION

The International Serum Industry Association (ISIA) has established industry standards to aid sera users in substantiating the traceability of serum products. The ISIA has implemented a rigid program of independent audits to verify compliance with traceability standards. ISIA Traceability Certified supplier is awarded to those that demonstrate full compliance with ISIA guidelines and are the subject of a successful audit. Further, the ISIA has established strict guidelines for product quality testing and reporting on documents like Certificates of Analysis (CoA). Sera users should source exclusively from ISIA-certified companies to ensure traceability.
